

Burlap and Candy Cane Reindeer Ornament

What you will need:

- 2 Candy Canes
- Burlap
- Googly Eyes
- 2 Buttons (one smaller than the other)
- Green Hemp or Baker's Twine
- Hot Glue Gun
- Scissors

What you will need:

1. Use a hot glue gun to add a generous amount of glue to the 2 candy canes to stick them together. Make sure that the top curve of each candy cane is pointing outward.
2. Cut a piece of burlap that measures approximately 4 1/2" x 4 1/2". Spread some hot glue on the candy canes and press one edge of the burlap on to the glue. Let it cool and then wrap the burlap around the candy canes twice. Glue the other end of the burlap down.
3. Trim off any extra burlap, both along the side and the bottom of the candy cane.

4. Flip the candy canes over and glue on two googly eyes.
5. Glue the two buttons on to look like a nose. Glue the larger button down first and then glue a smaller button on top of it. The buttons should be glued at the bottom edge of the burlap.
6. Cut a piece of coloured hemp or baker's twine that is about 8 inches long and tie it into a bow. Glue the bow to the top of the burlap and trim off the ends as desired. (This step is optional but it does add a little extra detail to the reindeer.)
7. Cut a piece of coloured hemp or twine that is about 12 inches long. Tie the ends together to form a loop. Glue this loop to the back of your reindeer so it can be hung up.
8. Your reindeer is now done!
