

Halloween Eyeball Slime

Instructions

1. In a plastic bowl, pour in both bottles of red glitter glue (or your glue and glitter substitute)
2. Pour in the water and starch.
3. Drop the eyeballs into the soupy mix.
4. Stir until the glue and eyeballs start to form a blob.
5. Transfer the blob to another bowl and begin kneading and squishing it until most of the liquid is removed.
6. Once the liquid is gone, and it feels just like slime, you're ready to play!

What you will need:

- 2 bottles red glitter glue (if you can't find red glitter glue, use 2 bottles of clear washable glue and 1/4 cup of red glitter)
- 8 oz water
- 8 oz liquid starch
- 1 packet of sticky eyeballs

Thanks to thetiptofairy.com for this great Halloween idea
